

Dredgers of the World, 5th Edition

*Clarksons Research Studies. 800 pages.
B/w illustrations. 2005. ISBN: 1-902157-69-9. 2005.
£155.00 / \$310.00 / € 235 + shipping.*

Now in its fifth edition, this well respected register is known to all those involved in the dredging industry. With the on-going assistance of the IADC and many of the world's best-known dredging contractors this most recent registry is even more comprehensive, with more pages, more vessels and more specification and performance data than ever. It has been completely updated and all information has been checked directly with the owners. Sample pages can be seen at the online website of Clarkson and/or OPL.

The information included for each vessel consists of:
General – name, owner, marine manager, year built, type, classification, flag, call sign.

Main Dimensions – LOA, breadth, depth, drafts (dredging, loaded and unloaded), GRT, NRT, DWT.

Machinery and Power – main engine(s), available power (all modes of operation), performance.

Dredging and discharge equipment – dredging depths, capacities (dredging and discharge), shore delivery system (if applicable), hopper capacity, pipe diameters.

Accommodation (if applicable).

Mooring system

Additional data – this includes details on every element of a dredger's specification or performance not listed under the main information headings.

Dredger types included are:

211 Backhoe, dipper, grab and clam shell dredgers.

18 Barge unloading dredgers.

56 Bucket ladder dredgers.

319 Cutter suction dredgers including bucket wheel dredgers.

27 Special equipment, e.g., agitation, water injection and worm-wheel dredgers.

27 Suction dredgers.

421 Trailing suction hopper dredgers.

A 25% discount is offered to members of the IADC, CEDA, IAPH or The Institute of Civil Engineers.

The book may be ordered on the attached IADC publications form. It is also available online and as a CD-Rom.

Maintenance Dredging 2

EDITED BY THE INSTITUTION OF CIVIL ENGINEERS

*Thomas Telford Ltd Publishers. 184 pp. Hardbound.
2005. ISBN: 0727732889.
£ 95.00 / US\$199.00.*

This volume presents the *Proceedings of the Second International Conference on Maintenance Dredging* held in May 2004. The purpose of the conference was to provide a comprehensive update on all aspects of maintenance dredging including regulation, dredging methods, dredged material treatment and beneficial use, contract management, and environmental impact assessment and mitigation.

The papers relate to the following key areas:

- Regulation
- The practicalities of dredging
- Inland projects
- Contract management
- Environmental aspects

These papers provide state-of-the-art guidance on what is necessary to comply with regulations and what is possible in terms of current dredging practice. All those who are involved in the planning and execution of maintenance dredging, both coastal and inland, will find these conference papers informative and rewarding.
