

PRESS RELEASE

REGISTER NOW FOR THE “DREDGING FOR SUSTAINABLE INFRASTRUCTURE” COURSE: 24-26 SEPTEMBER IN DENMARK

10 July 2024 – Delft/Voorburg, the Netherlands

IADC and CEDA are pleased to announce the upcoming “**Dredging for Sustainable Infrastructure**” course, scheduled from **24-26 September 2024** in **Copenhagen**, Denmark. Supported by DHI, this comprehensive 2.5-day programme includes a **site visit** and is tailored for professionals engaged in dredging-related activities for water infrastructure development.

Participants will benefit from a specialised curriculum designed to equip them with the latest insights and techniques in achieving sustainable dredging projects. The course emphasises integrating environmental and socio-economic considerations into project development, ensuring projects meet primary functional requirements while enhancing natural systems and stakeholder engagement.

“This course, rooted in the principles outlined in the book *Dredging for Sustainable Infrastructure*, fills a critical knowledge gap in the industry,” remarked Rene Kolman, Secretary General of IADC. “Attendees will learn from experienced lecturers who will impart cutting-edge methodologies and practical strategies through workshops and case studies. Whether you’re an engineer, ecologist, regulator or financier, this course offers invaluable tools to enhance your professional practice.”

Mieke van Loenen, General Manager of CEDA, added, “Our goal is to empower professionals across various sectors – including government, consultancy firms, dredging companies, and NGOs – with the knowledge needed to drive sustainable infrastructure projects. This course is essential for anyone involved in port development, river deepening, coastal protection, flood defence and other critical infrastructure initiatives.”

Participants are encouraged to register early to secure their place. Members of IADC, CEDA, PIANC, and IAPH can take advantage of special rates.

About CEDA

Central Dredging Association (CEDA) is an established authority and the leading independent forum for the professional dredging community, and associated industries, in Europe, Africa and the Middle East. It represents dredging professionals and organisations, from government, academia and business, in the region, and fosters and promotes the understanding and advancement of dredging to the wider community. CEDA is part of the World Organization of Dredging Associations (WODA). CEDA's two sister associations, WEDA (Western Dredging Association) and EADA (Eastern Dredging Association), serve the Americas, and Asia, Australia and the Pacific region respectively. For further information, visit www.dredging.org.

About IADC

The International Association of Dredging Companies (IADC) is the global umbrella organisation for contractors in the private dredging industry. IADC has over a hundred main and associated members. Together they represent the forefront of the dredging industry. An industry that makes the world a safer, better and more sustainable place to live. IADC is driven to help that industry move forward with a variety of activities and publications, all available by visiting www.iadc-dredging.com.
